Where a Fund has a particularly concentrated portfolio and a particular investment declines or is otherwise adversely affected, it may have a more pronounced effect than if the Fund held a larger number of investments. All Rights Reserved ■ BIM(UK)L Risk Grading: High Risk (on a scale of Low, Medium, Medium/High and High). This grading applies to Funds with emerging market, small capitalisation, or narrowly focused/concentrated equity mandates, which may restrict liquidity and increase the volatility of returns. It should only be used for comparison with other BlackRock Global Funds (BGF) and, in particular, should not be used in comparison with Funds not provided by BIM(UK)L. The grading is indicative of the level of risk of a particular Fund and is not supposed to be a guarantee of likely returns. If you are in any doubt as to the level of risk that you should take, you should seek Independent Advice. ■ This factsheet is available to Qualified Investors and Professionals in some jurisdictions on a limited private placement basis subject to applicable laws and regulations in the country of distribution. The factsheet is confidential and should not be reproduced or distributed to persons other than the recipient. Performance is shown as of the date listed on the top of the sheet on a NAV price basis with income reinvested. Prior to the introduction of single pricing on 4 February 2002, bid prices were used for Funds previously within the Mercury Selected Trust range. Performance figures are calculated net of annual fees. The above Fund data is for information only. The number of shares quoted for each fund are indicative and actual numbers may fall outside of the ranges shown. BGF is an open-ended investment company established in Luxembourg.
